PROFILE

Data Science undergraduate with hands on experience in Python, SQL, machine learning and data visualization. Skilled in exploratory data analysis, predictive modeling, and dashboard development to extract actionable insights from large datasets. Experienced in building NLP systems, deep learning models, and business intelligence dashboards.

EDUCATION

United University

Bachelor of Technology in Computer Science and Engineering

Prayagraj, India

Sep. 2023 – Present

Sri Chaitanya Vidya Niketan

Intermediate

Visakhapatnam, India

2022

Y.M.C.A Centenary School & College

High School

Prayagraj, India

2020

EXPERIENCE

Infosys

Data Visualization Intern

Remote

Sep. 2025 – Nov. 2025

- Led a team of interns to develop interactive Power BI dashboards analyzing Indian General Election datasets.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) on large datasets.
- Coordinated team tasks and streamlined dashboard development, improving reporting efficiency and project delivery.

AICTE

AI & Cloud Intern

Remote

Jul. 2025 – Aug. 2025

- Built an AI chatbot using IBM Watson Assistant and IBM Cloud for automated user interaction.
- Applied NLP techniques for intent detection and response classification.
- Designed conversational workflows and deployed scalable cloud-based AI solutions.

PROJECTS

Stock Price Prediction using LSTM | *PyTorch, Python, Scikit-learn, Pandas*

Apr. 2026

- Built an end-to-end Deep Learning pipeline to predict Amazon (AMZN) next-day closing prices using a stacked 2-layer LSTM network with 200K trainable parameters in PyTorch.
- Implemented BatchNorm, Dropout (0.2), early stopping, and an 80/20 train-test split on 9 years of historical data (2,266 trading days).
- Evaluated on 313 unseen test-set trading days achieving 14.54% MAPE; generated 30-day future price forecasts with full residual and loss curve analysis.

Chat Cleaner – NLP Chat Classification System | *Python, Sentence-BERT, Flask, Hugging Face*

Jan. 2025

- Built an NLP based chat classification tool to analyze and filter live chat messages.
- Reduced duplicate messages by 70% using semantic similarity detection.
- Implemented toxicity detection models filtering 95%+ irrelevant content.

Sentiment Analysis on Amazon Reviews (80k+ Records) | *Python, Pandas, Scikit-learn, NLP*

Jul. 2025

- Developed a sentiment analysis pipeline processing 80,000+ product reviews.
- Applied text preprocessing, TF-IDF feature extraction, and ML model comparison.
- Achieved 87% F1-score after model optimization.

TECHNICAL SKILLS

Languages: Python, C

Data Science: Machine Learning, Deep Learning, NLP, Data Preprocessing

Libraries: Pandas, Scikit-learn, Matplotlib

Database: SQL, MySQL

Tools: Power BI, Excel, Git, GitHub

Web: HTML, CSS, JavaScript

Soft Skills: Team Leadership, Cross-functional Collaboration, Technical Communication

CERTIFICATES

Oracle Cloud Infrastructure 2025 – Certified AI Foundations Associate

Fundamentals of Machine Learning and Artificial Intelligence – AWS

Data Analysis Using Python – IBM

Python for Data Science – IBM

Data Visualization Job Simulation – TATA (Forage)

Data Analytics Job Simulation – Deloitte (Forage)

EXTRACURRICULAR ACTIVITIES

GeeksforGeeks

Campus Ambassador

Jan. 2026 – Jun. 2026

- Represented GeeksforGeeks as Campus Ambassador, promoting technical content and events.

United University

Organiser & Tech Team – HackDiwas 3.0

Apr. 2026

- Organised and managed all tech-related operations for HackDiwas 3.0, a two-day software and hardware hackathon at United University, Prayagraj.
- Served as a technical judge alongside faculty, evaluating team submissions on code quality, problem-solving approach, and implementation feasibility.

United University

Co-Organized HackDiwas 2.0

Apr. 2025 – May 2025

- Co-organized HackDiwas 2.0, managing event logistics, participant coordination, and hackathon execution.
